LAB 4: ANALZING NETWORK DATA LOG

You are provided with the data file, in .csv format, in the working directory. Write the program to extract the following informations.

EXERCISE 4A: TOP TALKERS AND LISTENERS

One of the most commonly used function in analyzing data log is finding out the IP address of the hosts that send out large amount of packet and hosts that receive large number of packets, usually know as TOP TALKERS and LISTENERS. Based on the IP address we can obtained the organization who owns the IP address.

List the TOP 5 TALKERS

Rank	IP address	# of packets	Organisation
1	193.62.192.8	3041	EUR-BIO-INST
2	155.69.160.32	2975	NTUNET1
3	130.14.250.11	2604	NLM-ETHER
4	14.139.196.58	2452	NKN-IIT-GUW
5	140.112.8.139	2056	T-NTU.EDU.TW-NET

TOP 5 LISTENERS

Rank	IP address	# of packets	Organisation
1	103.37.198.100	3841	A-STAR-AS-AP
2	137.132.228.15	3715	NUSNET
3	202.21.159.244	2446	RPNET
4	192.101.107.153	2368	PNNL
5	103.21.126.2	2056	IITB-IN

EXERCISE 4B: TRANSPORT PROTOCOL

Using the IP protocol type attribute, determine the percentage of TCP and UDP protocol

	Header value	Transport layer protocol	# of packets
1	6	TCP	56064 (80.82%)
2	17	UDP	9462 (13.64%)

EXERCISE 4C: APPLICATIONS PROTOCOL

Using the Destination IP port number determine the most frequently used application protocol. (For finding the service given the port number https://www.adminsub.net/tcp-udp-port-finder/)

Rank	Destination IP port number	# of packets	Service
1	443	13423	HTTPS
2	80	2647	HTTP
3	52866	2068	Dynamic and/or Private Ports

4	45512	1356	Unassigned
5	56152	1341	Dynamic and/or Private Ports

EXERCISE 4D: TRAFFIC

The traffic intensity is an important parameter that a network engineer needs to monitor closely to determine if there is congestion. You would use the IP packet size to calculate the estimated total traffic over the monitored period of 15 seconds. (Assume the sampling rate is 1 in 2048)

Total Traffic(MB)	126519.18359375

EXERCISE 4E: ADDITIONAL ANALYSIS

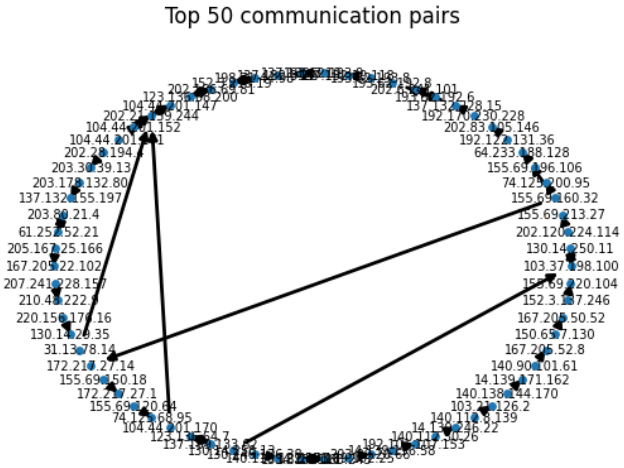
Please append ONE page to provide additional analysis of the data and the insight it provides. Examples include:
Top 5 communication pairs;
Visualization of communications between different IP hosts;
etc.

Please limit your results within one page (and any additional results that fall beyond one page limit will not be assessed).

Top 5 communication pairs:

Rank	Src IP	Dst IP	# of packets	Src Org	Dst Org
1	193.62.192.8	137.132.228.15	3041	EUR-BIO-INST	NUSNET
2	130.14.250.11	103.37.198.100	2599	NLM-ETHER	A-STAR-AS-AP
3	14.139.196.58	192.101.107.153	2368	NKN-IIT-GUW	PNNL
4	140.112.8.139	103.21.126.2	2056	T-NTU.EDU.TW-NET	IITB-IN
5	137.132.228.15	193.62.192.8	1910	NUSNET	EUR-BIO-INST

Here I plot the top 50 communication pairs.



EXERCISE 4F: SOFTWARE CODE

Please also submit your code to the NTULearn lab site.
